

## The Game Ready Advantage

Here's what makes Game Ready a powerful recovery tool and an easy-to-use treatment option for soft tissue injuries and post-surgical care:

### Adjustable Cold Therapy

Cold therapy has been shown to decrease pain and muscle spasms, tissue damage and swelling<sup>1</sup>. Game Ready's temperature adjustability allows for customized and comfortable cold application which can help to improve patient compliance.

### Intermittent Compression

Compression has been shown to limit swelling, control edema formation, and encourage acceleration of the healing process<sup>1,2</sup>. In addition, intermittent compression has been shown to be more effective than static compression in the clinical setting<sup>2</sup>.

### Enhanced Comfort and Ease of Use

Game Ready's circumferential wraps are easy to apply and comfortable to use without the mess or hassle of ice packs.

### Portable Therapy

Our battery pack option and customized carry bag allow you to administer treatment on the go or wherever it is required.

### One-Year Warranty

A one-year warranty is provided on the Game Ready Control Unit and each wrap's air and water chamber.

### Ask Your Doctor For Game Ready

Game Ready is only available through prescription – ask your doctor, physical therapist or other qualified medical professional if it's the right solution for you.

"Utilizing Game Ready following orthopedic procedures, we've seen a dramatic decrease in post operative pain, a decrease in hospital stays, and quicker return to work or athletic participation.

**Sanford Kunkel, MD**  
Orthopedic Surgeon  
OrthoIndy, Indianapolis

"I am a patient of the Steadman-Hawkins Clinic and have used the Game Ready System countless times. It is awesome for reducing pain and allowing me to rehab faster and more comfortably. THANKS!"

**Phoo Klawsky**  
Patient

"I've seen a two-fold increase in recovery rates. Guys are back in half the time."

**Stan Conte, PT ATC**  
Head Athletic Trainer  
SF Giants, 2000-2006

GAME READY™

INJURY TREATMENT SYSTEM

## A New Way to Heal from Orthopedic Surgery or Injury

## Get Back Into Your Regular Routine – Fast

If you've been injured or are facing orthopedic surgery, your doctor has probably told you that the key to a fast, complete recovery is the quality of your rehabilitative care.

Game Ready can be an important part of the healing process. Our Injury Treatment System replaces outdated ice packs and elastic bandages with an advanced cold and compression regimen that can help reduce pain, swelling, tissue damage, and muscle spasms.

When Healing Matters, the Professionals Choose Game Ready.

Game Ready is so effective, it's the injury treatment system of choice for athletic trainers and athletes in virtually every professional sport, including the **NFL**, **NBA**, and **NHL** – as well as for premier orthopedic and physical therapy clinics nationwide.

## Why Do Cold and Compression Work So Well Together?

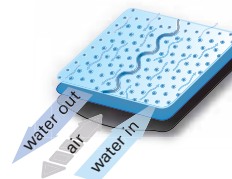

Studies show<sup>1</sup> that cold therapy decreases pain, muscle spasms, and swelling in soft tissue injuries and decreases the likelihood of tissue damage. Intermittent compression pushes excess fluid away from the injury, which helps to eliminate existing swelling and minimize new swelling<sup>2</sup>. When combined, these two therapies produce a new level of healing.

Game Ready delivers a unique combination of active compression and cooling, as well as comfortable, form-fitting anatomic wraps, and adjustable pressure and temperature settings, all in a state-of-the-art system. Simply put, there is nothing else like it.

Continuous circulation of water and intermittent compression helps the healing process.

Our patented Dual-Action Wraps feature two separate internal chambers, one for air and another for water. This unique design enables simultaneous adjustable compression and fluid circulation technology.

## Different Injuries, Different Wraps

Game Ready's anatomic wraps use NASA spacesuit technology to provide a precise, comfortable fit – no matter where you're hurting. They're designed to fit virtually every body part, including ankles, knees, back, hip/groin, shoulders, elbows and wrists. For rehabilitation related to ACL surgery or total knee repair, there's even a special Articulated Knee Wrap designed for use with continuous passive motion (CPM) machines.
